

# Yuheng (Lyle) Li

4601 Bayard Street Apt 406 Pittsburgh, PA 15213 | (412)539-6977 | yuhengli@cmu.edu

## OBJECTIVE

---

Full-time Software Engineer

## EDUCATION

---

|   |           |
|---|-----------|
| MSIT, eBusiness Technology, <b>Carnegie Mellon University</b> , Pittsburgh, PA (GPA 3.94/4.0)       | 2015-2016 |
| M.Eng., Data Mining, <b>University of Chinese Academy of Sciences</b> , China                       | 2012-2015 |
| B.S., Electronic Information Science and Technology, <b>Jilin University</b> , China (GPA 3.81/4.0) | 2008-2012 |

## TECHNICAL SKILLS

---

**Language:** Java; C#, Python, C/C++, JavaScript, HTML/CSS, JSP, Shell Scripting.

**Tools:** J2EE, .NET, WPF, JDBC, Oracle 11g, MySQL, SVN/Git, Maven, Tomcat, Visual Studio, Eclipse, AWS, Azure.

**Knowledge:** OOP/OOD, Data Mining, Machine Learning, Algorithms, Software Architecture, digital electronics.

## INTERNSHIP

---

**Assistant Software Engineer, Chinese Academy of Science(CAS)**, Beijing China 2014-2015

- Responsible for developing GeoVis, a GoogleEarth-like Information Analysis System;
- 1 year+ software development and scientific research with 20+ people team, 10,000+ line codes experiences.

## PROJECTS

---

**Web Services Load Balancing with Horizontal Scaling**, Pittsburgh, PA 02/2016

- Utilized both AWS and Azure to programmatically control resources in response to demand;
- Optimized rules for AWS Auto Scaling Group to solve the unpredictable sudden request surge;
- Implemented load balancer with CPU-weighted round-robin scheduling and health check mechanism in Java.

**Hadoop-based User Web Behavior Analysis for Wikipedia**, Pittsburgh, PA 01/2016

- Implemented Mapper and Reducer with Java and ran on AWS Elastic MapReduce;
- Preprocessed one-half Terabyte page view CSV data from Wikimedia using Java;
- Analyzed page-view trends and derive the trending topics with Python and bash scripting(awk, sed, etc).

**Carnegie Financial Web Services for Mutual Fund Transaction**, Pittsburgh, PA 01/2016

(<http://cfsenvironment.pmymaat6rx.us-west-2.elasticbeanstalk.com>)

- Developed a three-tier RESTful Web application with Java J2EE, JSP, Bootstrap, Tomcat and MySQL;
- Utilized Atomic Transactions to ensure the atomicity and consistency of fund transactions in DAO design;
- Implemented MVC design pattern for authentication control, role-based access control and fund operations;
- Analyzed and measured the performance and availability of the web service with Apache JMeter.

**Twitter based Entity Linking System**, Beijing, China 06/2015

- Developed an entity linking system with C#, WPF, Twitter REST APIs, Wikimedia and Hadoop;
- Achieved Twitter mention disambiguation by automatically linking to corresponding Wikipedia articles;
- Proposed an improved Entity Linking algorithm, which models multiple features(user preferences, popularity etc.) of wiki entities and levitated the In-KB accuracy by 5% (compared with KAURI) to 90.17%.

**GeoVis Information Analysis System**(Product developed at CAS, Beijing China) 2014-2015

- Developed a software plugin with C#, WPF, Oracle 11g and SVN based on a GoogleEarth Like 3D globe;
- Customized 50+ data-driven usercontrols for data visualization, like track simulation, tri-state treeview etc.;
- Enhanced the data visualization effect by implementing an adaptive K-means to cluster spatial and temporal data from different altitude scales, leading to real-time data rearrangement and visualization.

## COURSES

---

Java/J2EE Programming, Cloud Computing, Data Structure, Data Mining, Machine Learning, Natural Language Processing, Signal and Information Processing, Analog/Digital Electronics, Laws of Computer Technology.
